

SmartPAT 5500

Portable Appliance Testing

Integral Floppy Disk Drive

The **SmartPAT 5500** is supplied pre loaded with all of the most common test sequences for Class I and Class II appliances. It is also fully user programmable allowing specific test sequences to be set up and stored for particular appliance conditions. In addition to performing fast auto-tests the unit can also perform individual safety tests eg. bond test at the press of a button.

The **SmartPAT 5500** is provided with an extensive on-line help system which can be called upon for assistance during any part of a test sequence.

SmartPAT 5500

The **SmartPAT 5500** is capable of performing Earth Bond, Insulation, Fuse Continuity, Run/Leakage and Flash Voltage Tests. The operating panel carries the feature buttons, serial port, floppy disk drive and the results display. The lid of the case provides a storage area for the cables associated with the appliance tester.

Using the optional wide-head barcode scanner, appliance number, site details and test sequences can be rapidly entered directly into **SmartPAT 5500**.

- Performs all tests prescribed by HSE.
- Integral disk drive for data storage.
- Tests 230V and 110V appliances.
- Auto test feature to save time on site.
- Flash Test.

SmartPAT Comparator	5500
Earth Bond Test (5A/10A/26A)	●
100mA Business Equipment Test	●
Insulation Test	●
P-N Continuity/Fuse Test	●
Earth leakage	●
Tests 110V and 240V appliances	●
Flash Tests	●
Downloads to a Printer	●
Downloads to a Computer	●
Internal Floppy Drive	●
IEC Lead Test	●
Reads Barcodes	●
Input Voltage 110V/230V	●
On Board Help	●

On-board Data Memory allows up to 1000 records to be stored

Tests 230V and 110V appliances and also performs IEC lead tests.

Dedicated communication port for downloading test results

Easy to use Auto test
